AirCap® E 200m

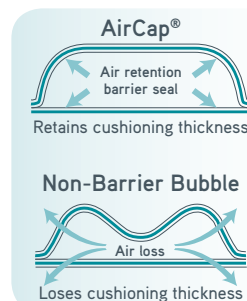

Barrier- sealed bubble packaging

Over 50 years of experience producing bubble enables Sealed Air to redesign the bubble configuration.

ENERGY SAVING
EFFICIENT IN WAREHOUSING
EFFECTIVE IN PROTECTION
ECONOMICAL IN TRANSPORT
ENVIRONMENTALLY FRIENDLY

- With the same warehouse space you can put 20% more AirCap® E 200m bubble than standard AirCap® E 100m bubble
- With AirCap® E bubble you can transport more bubble in the same truck, reducing carbon dioxide emissions and giving increased value per M³
- AirCap® E barrier sealed bubble is reusable and recyclable
- AirCap® E 200m gives increased handling efficiencies with less roll changes required, saving valuable time.

THE DIFFERENCE IS IN THE BARRIER

The amount of loss of protection is directly correlated to the amount of thickness loss under load:

**THICKNESS LOSS =
LOSS OF CUSHIONING =
LOSS OF PRODUCT PROTECTION**

SPECIFICATIONS

Bubble type	Length (m)	Width (mm)	Area (m ²)
Small Bubbles:			
EL Light	200	1500	300

AirCap® rolls 1500mm wide are available slit into the following standard dimensions:
